DE-RISK YOUR DIGITAL HEALTH JOURNEY

Your partner for compliance and growth

Meeting standards and regulations helps you to build trust in your technology and gain access to the health and care markets.

But how do you know which standards and regulations are relevant? How do you gain and maintain compliance? And how do you capitalise on this?

ORCHA is the world leader in digital health accreditation. We will guide you every step of the way, ensuring you:

- Go through the right assessments and achieve compliance, such as DTAC
- Retain compliance after product or standards updates
- Feature in digital health libraries used by the world's healthcare professionals, once you have passed
- Access market insights to maximise your growth plans

ORCHA helps develop standards, and build accreditation frameworks in Europe, the US and Australasia. Our clients include:

NICE National Institute for Health and Care Excellence

5 million

health apps are downloaded every day

93%

of healthcare workers believe digital health can improve patient health

28%

of app usage is recommended by healthcare professionals

only 20%

of 375,000 digital health products meet safety standards

ORCHA DIGITAL HEALTH SUPPLIER SERVICES

Healthcare is in the midst of a digital revolution and healthcare professionals believe digital health can improve patient health. But there is low trust and difficulty finding the right solutions in an unregulated 'wild west' of hundreds and thousands of apps.

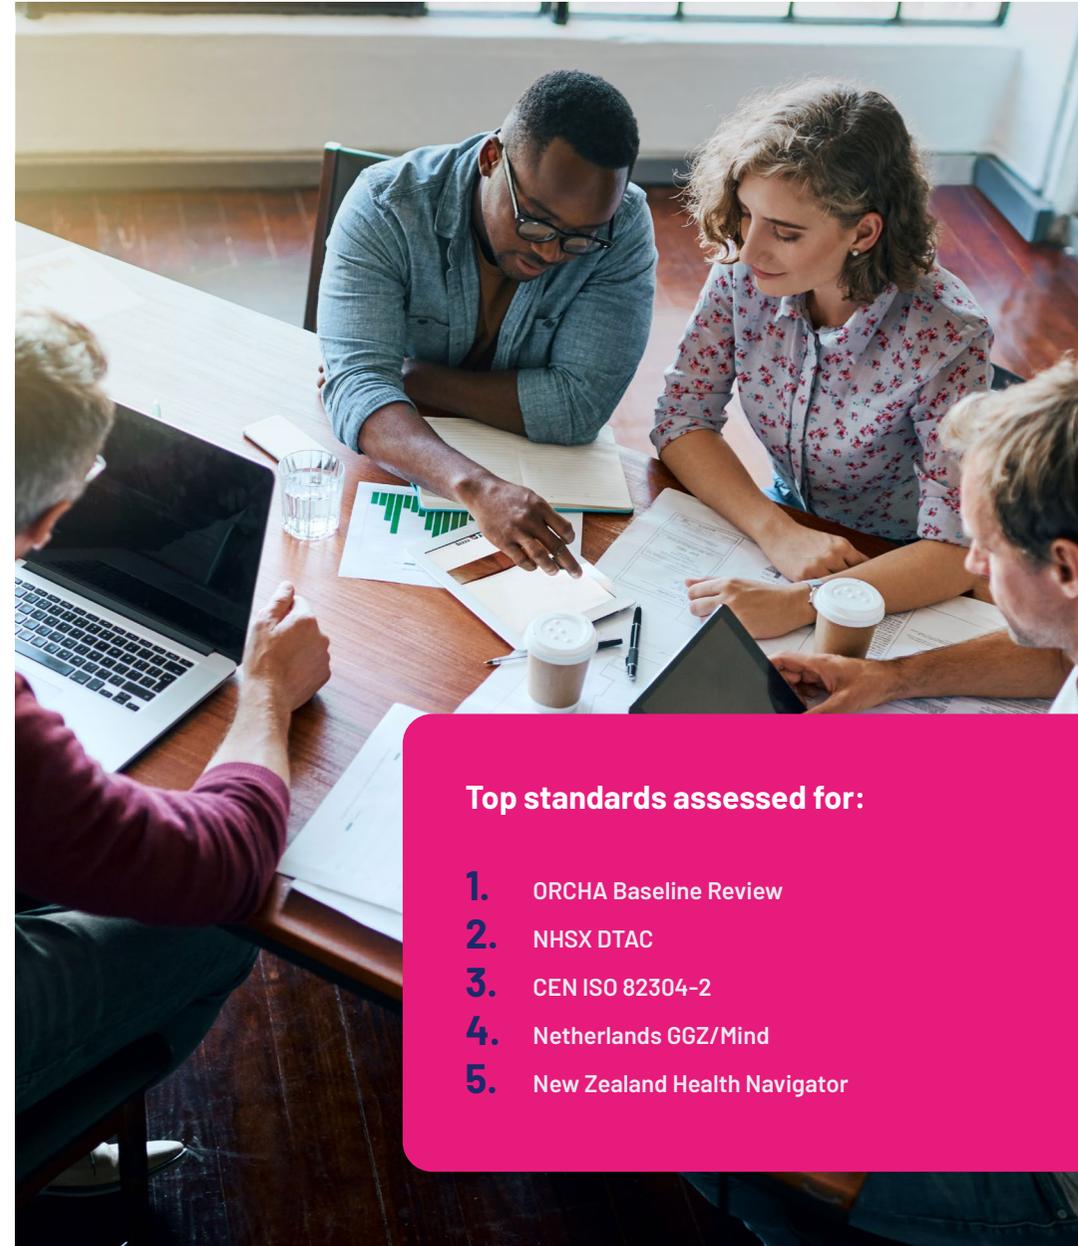

Trust, access and risk management are critical to increase the use of your digital health by health and care providers. But navigating standards and regulations for growth and internationalisation can be hard, so we will guide you every step of the way.

Trusted Digital Health With our review services

Meeting standards and regulations demonstrates that your product is high quality, helping you to build trust in your technology and gain access to the health and care markets. With our turnkey end-to-end technology solution, ORCHA is the world leader in digital health accreditation, providing:

- **Expert advice:** So you know which standards are required and are best prepared for assessment.
- **Reviews:** Undergo a rapid certification with unmatched speed and accuracy, including certification of:
 - The ORCHA Baseline Review –the most comprehensive, independent assessment model today, forming the foundation for a growing number of international accreditations and certification schemes.
 - The new Digital Technology Assessment Criteria (DTAC) for health and social care.

If you pass, receive an independent and trusted certification, and if you fail, receive a confidential improvement report.
- **Compliance gateway:** Your data is privately held in a compliance gateway, which can be shared with healthcare organisations. So you can certify once and demonstrate compliance to all.

Top standards assessed for:

1. ORCHA Baseline Review
2. NHSX DTAC
3. CEN ISO 82304-2
4. Netherlands GGZ/Mind
5. New Zealand Health Navigator

ORCHA DIGITAL HEALTH SUPPLIER SERVICES

Access and Activation *With our expansion services*

To help support the best digital health suppliers to stand out from the crowd and succeed, we have a range of growth services, including:

- **Digital Health Libraries:** ORCHA provides digital health libraries of compliant products to health and care organisations across the UK and in twelve countries worldwide. So achieving compliance in a review with us will help commissioners and healthcare professionals to find and recommend your product.
- **Benchmarking report:** Our objective assessment, covering 350+ criteria, allows us to provide a detailed picture of how your product compares to both the standards required and the competition, helping to inform your product and market strategy.
- **International digital health frameworks advice:** As international accreditation experts, we can advise on your compliance standing for international standards such as the CEN ISO 82340-2. Plus, our compliance gateway allows you to undergo assessment in the twelve national frameworks we actively operate in, by adding only the 'top-up' data needed to apply.

Risk Management *Governance in digital health compliance*

Re-review service - Healthcare providers require their digital health products to achieve continuous compliance with all relevant standards and regulations. Our platform continuously scans for changes to standards and updates to products, triages this information, and flags if your product needs to undergo a re-review to remain compliant. If a re-review is needed, we can carry that out and fast-track it.

What our health and care clients say about us:

"We are now able to support people to look after their mental health, and this app library provides a one-stop shop where the public can access safe and secure apps to help them during the pandemic."

Robin Swann,
Health Minister, Northern Ireland

"By working with ORCHA to create an online platform of apps that are safe for our young people to use, we know that we can encourage more young people to reach out for help, and save more young lives."

Lisa Roxby,
Papyrus, the UK Charity for the
Prevention of Young Suicide

"[ORCHA] helps us to break down the barriers and mitigate issues around digital health. Previously, our clinical leads didn't recommend digital health technologies as they had no idea where to look... and couldn't tell if a technology was of a good standard."

Crystal Dennis,
Interim Lead for Public Facing Digital Health Services,
Our Dorset Digital

"It gives you, in essence, a kitemark... having something like ORCHA is a game changer."

Dr Devender Roberts,
Maternity Clinical Director,
Health Minister, Northern Ireland.
Consultant in Obstetrics and Fetal Medicine to the
Liverpool Women's NHS Foundation Trust

ABOUT ORCHA

ORCHA is the world's leader in digital health standards. Since 2015, we have helped develop standards, built accreditation frameworks in Europe, the US and Australasia, and have conducted more than 12,000 digital health reviews, each assessing more than 350 measures.

Our end-to-end technology certifies digital health at unmatched speed, allowing you to gain and retain compliance after product or standards updates.

"I would highly recommend the independent review that ORCHA does. It makes you ask questions about your business that you hadn't thought of before."

Alistair Martin,
Former CEO, Transforming Systems
